FRONTEND DEVELOPER · REACT · NEXT.JS · TYPESCRIPT

Frontend developer and Computer Science student focused on modern web engineering with React, Next.js, and TypeScript. I build clear product interfaces and explore applied AI as an additional way to make software more useful.

EDUCATION

Newton School of Technology — 2025 - Present
B.Tech · Computer Science & Engineering (AI & ML) — Undergraduate program

SELECTED PROJECTS

StudyMate
Next.js study workflow for material-grounded chat, quizzes, and revision plans. Retrieval ranks course chunks by keyword overlap.
Repository

TerraMind
React/Vite nature companion with Ollama or rule-based offline missions and a local IndexedDB field journal.
Repository

NutriScan AI
React/Vite food-analysis interface for Indian cuisine, with photo or text input, Gemini estimates, nutrition charts, and saved scans.
Repository

PlateProfit AI
Next.js prototype for ingredient and recipe costs, unit conversion, invoice text parsing, and menu-price scenarios.
Repository

Ocean3D / OCEAN-X
3D ocean exploration concept using CesiumJS; the current demo identifies its data as synthetic.
Repository

Skardela
Browser-based collection of four daily logic puzzles with streaks and personal-best tracking.
Repository

OPEN-SOURCE & COLLABORATIVE WORK

CNTRL browser · Omnikon · six merged PRs
Worked across a Tauri/Rust and SolidJS browser on memory and privacy foundations, native fallback fetching, keyboard navigation, accessible labels, and tab behavior.
Pull requests: #59 · #44 · #43 · #26 · #23 · #22

Karyalaya AI · HackDay 2026 · merged PR #9
Four-person team project; contributed PDF approval notes, formatting fixes, audit logging, and OCR/RAG document handling.

Additional merged community contributions: Hacktoberfest 2025 · Python wallet-generator PR #14 · FirstLeaf contributor entry PR #88.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Vite
Applied AI: Ollama, Gemini, retrieval-augmented workflows
Additional tools across projects: Python, FastAPI, Node.js, IndexedDB, CesiumJS, Three.js, WebGL
